# Ultra Live Center RN

## Clamping tools for clamping on machine tools

NEIDLEIN ultra live centers are designed for employment in turning, grinding and other production machines.

Owing to the application of bearing and the stable construction high axial and radial load can be absorbed accurately. Therefore our live centers are outstanding for any application, especially for tooling with face drivers.

# Ultra Live Center RNA

## Clamping tools for clamping on machine tools

NEIDLEIN ultra live centers type RNA are designed for employment in turning and other production machines.

➔ **for large work piece centers**  
High degree of flexibility for clamping of work pieces with large centers.

**Variety of center cones ranging from Ø 25 to Ø315, see page 16.**  
Special cones up to Ø400 available upon customer's request.

### NEIDLEIN revolving ultra live centers type RNW ensure:

- Application of live centers in case of high thrust and loading.
- true running accuracy max. 0.01
- Easy exchange of changeable inserts using spanner flat and open-end wrench or Tommy bar.
- Maintenance-free, due to gasket system and life-time lubrication of bearings. Gasket system comprising variable seal and steel comprehensive protection cover.
- Excellent demounting by means of extracting nut and extracting disk, which ensures safe and easy removal of the live center from the tailstock spindle sleeve.

# Ultra Live Centers Type Cone Head RKA

## Clamping tools for clamping on machine tools

NEIDLEIN ultra live centers type cone head RKA are designed for heavy work pieces with large centers.

The **modular clamping system** allows for a high degree of flexibility. It enables clamping of work pieces with centers from **Ø50 to Ø460**.

Type RKA basic retainer with morse taper

Work pieces with centers between Ø40 and Ø115 can be clamped using the basic retainer. Basic retainer including extraction nut.

cat. no.	type	MK	D4	D5	L2	L3	L4	rpm max. [1/min]	weight of work piece max. [kg]	axial load max. [daN]

## Ultra Live Center RNF

### Clamping tools for clamping on machine tools

NEIDLEIN ultra live centers type RNF are especially suitable for employment in turrets, in manual tailstocks and in case of linear thermal extension of work pieces.

The spring loaded, moving spindle and the engraved scale rings enable the adjustment and/or programming of various axial forces.

Type RNF with morse taper

● Models with extraction thread or with special spindles are available upon customer's request.

### NEIDLEIN ultra live centers type RNF ensure:

- Employment of live centers in turrets and manual tailstocks when hydraulic systems cannot guarantee any repositioning.
- Compensation if there is a linear thermal extension of work pieces or if the extension is caused by the process of machining.
- High true run-out accuracy **max. 0,003**
- Maintenance free, due to the gasket system and the lifetime lubrication filling of the bearing.
- Obtaining of the axial forces applied via scale rings as well as clarification of the force ranges on the outside of the housing.

## Ultra Live Center RNF / RNCF VDI

### Clamping tools for clamping on machine tools

NEIDLEIN ultra live centers type RNF/RNCF VDI are adapted in the tool turret and are especially suited for CNC machines without tailstock or with sub spindle.

The spring loaded, moving spindle and the engraved scale rings enable the adjustment and/or programming of various axial forces.

92104	FNC MK6	6	64	M68 x 1.5	20	330	148

● high true running accuracy max. 0.002

All types with extracting thread to prevent spindle ball bearings or solid spindle sleeves from damage. Extracting nuts see page 19 for accessories.

## Dead Centers FNA / FNW

### Clamping tools for clamping on machine tools

→ for large work piece centers

High degree of flexibility for clamping of work pieces with large centers.

Different types of center cones from Ø25 to Ø315, see page 16.

Special center cones up to Ø400 available upon customer's request.

#### Type FNA with morse taper

# Changeable Center Cone for RNA / FNA

## Clamping tools for clamping on machine tools

### Center cones for large work piece centers

High degree of flexibility for clamping of work pieces with large centers.

Suitable for live centers type RNA on page 6 and for dead centers type FNA on page 13.

Special cones up to  $\varnothing 400$  available upon customer's request.

For type RNA / FNA with SK30 interface

The center cones are fastened with a screw M8 DIN 912 onto the base body.

The center cones can be forced off with a screw M10.

## Changeable Inserts for RNW / FNW

### Clamping tools for clamping on machine tools

#### Changeable inserts for a maximum of flexibility

The adaptation of various changeable inserts ensures a high degree of flexibility and saving of costs.

Suitable for live centers type RNW on page 7 and for the dead centers type FNW on page 13.

Special inserts available upon customer's request.

## Custom-Made Designs

Upon customer's request we design and produce center pins for any kind of clamping device.

Made of **tool steel** or with **carbide insert**, standard or customized tapers. You advise us of your requirements and we will submit a non-binding offer to you with best possible delivery time.

Type RN special 4881-00-02

with extra long spindle for more workspace for tools

Type RN special 4428-00

with air-trough attachment unit/for chip cleanup on work piece

Dead center special SK1703-173

with taper 1:7.5 for spindle sleeves mounted in e.g. EMAG machine tools.

Dead center 91812

with short taper SK30 various types for MAG/ Böhlinger and INDEX machines
